# INTRODUCTION

The bell rings, and just like that the pop quiz starts. You flip your paper and to your surprise, it's blank. You look around the class to see if anyone else is confused. When you look back at your paper, words start to appear.

**TOP SECRET  
CLASSIFIED**

**FOR AGENT EYES ONLY.  
DO NOT SHARE. DO NOT COPY.**

You have been recruited to join a team of special agents! Our intelligence team has determined that you have the qualities and skills necessary to be an agent. We need your help!

Leave class and immediately proceed to the gym storage room. You have precisely 4 minutes to get there. Use the code NAE.

You rush to the gym. Attached to the door of the storage room is a strange looking keypad. You type in the code and the door creaks open. You enter and the door slowly closes behind you.

As your eyes adjust to the dimly lit room, you notice all gym equipment is missing. Instead, there is a long table with chairs on either side. A man in a blue suit sits at the table. What now?

# KEY TRUTH:

High levels of THC in  
cannabis e-liquid can  
increase the risk of

-----

**Tetrahydrocannabinol (THC)** is the chemical in cannabis that makes people feel "high." Some vape liquids have very high levels of THC, which makes it easier to get addicted. When someone is addicted, they feel the need to vape more and more. The influencers don't want you to know this because addiction means more money for cannabis and vape companies.

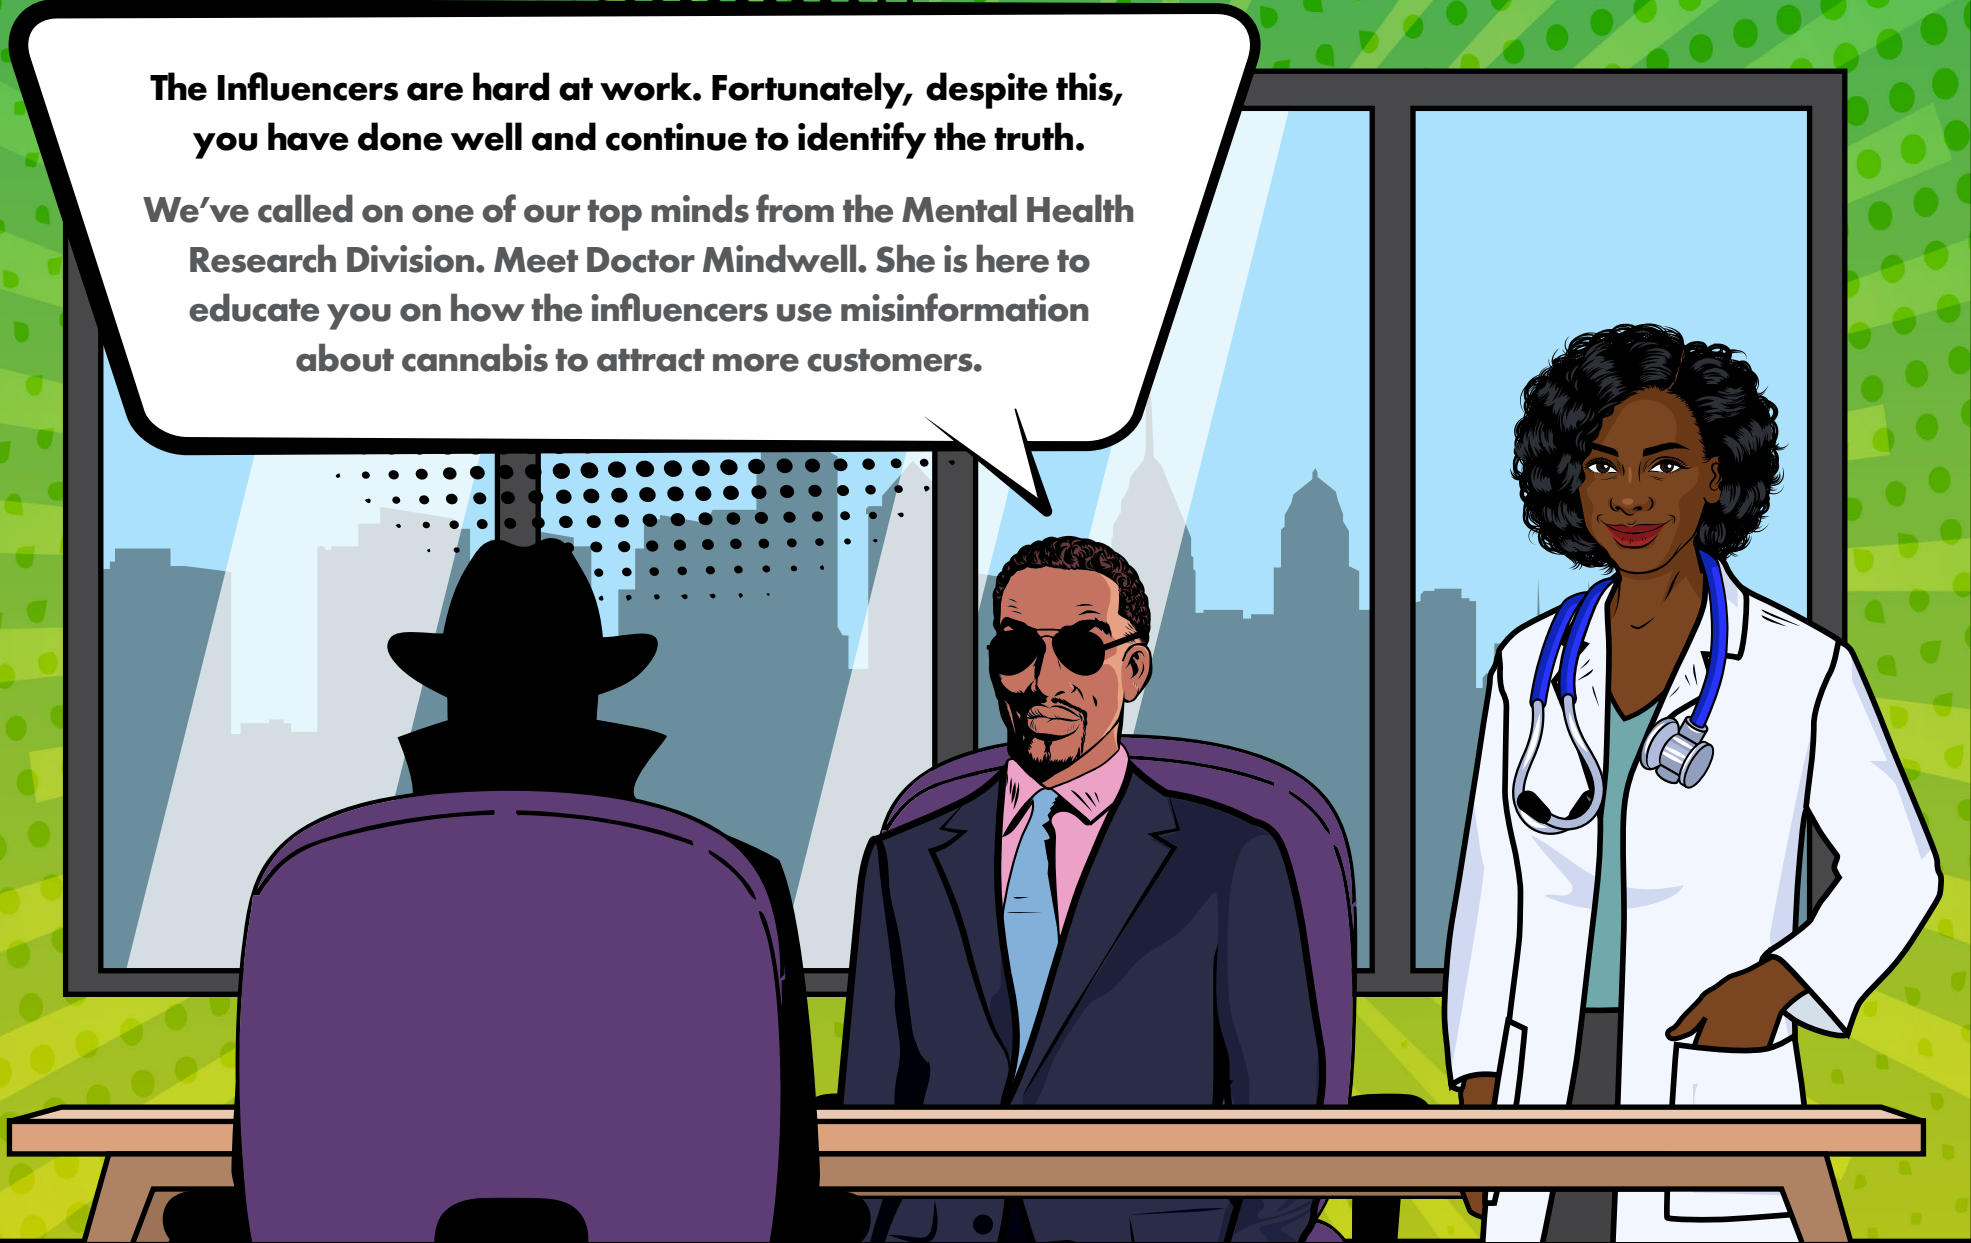

Great job revealing this critical intel. Collect **Mission File 03** from HQ.

# MISSION FILE 03A: **SEEK AND DISCOVER**

**The Influencers are hard at work. Fortunately, despite this, you have done well and continue to identify the truth.**

**We've called on one of our top minds from the Mental Health Research Division. Meet Doctor Mindwell. She is here to educate you on how the influencers use misinformation about cannabis to attract more customers.**

# KEY TRUTH:

Vaping cannabis can

affect mental health.

Vaping cannabis can cause a person to have trouble telling what's real from what's not. For example, hearing voices that aren't there or seeing things that others don't see.

Cannabis can make feelings of stress, anxiety, and depression worse. Let's see what Doctor Mindwell says about managing stress.

# MISSION FILE 03B: STRATEGIES FOR STRESS

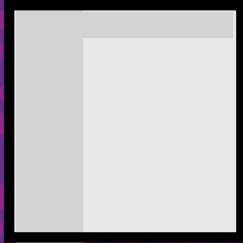

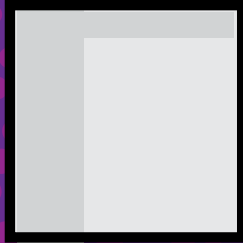

Thinking that cannabis helps feelings of stress, anxiety, and depression is one of the biggest lies the influencers spread! I train agents to handle stress so they can relax, take control, resist the lie, and focus on the mission at hand.

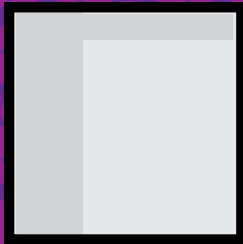

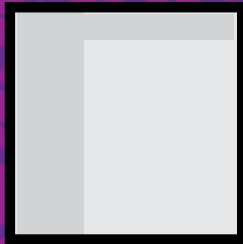

Our most experienced agents have created a list of strategies to help combat feelings of stress.

Everyone's doing it.**

**SUDDENLY  
your earpiece crackles...**

New intel suggests disposable vapes are contributing to a hidden environmental disaster. For your next mission you will be undercover with Agent Moth. Your mission: attend the Environmental Science presentation in your school library.

You will be stationed by the Product Lifecycle & Waste display for surveillance. Agent Moth will find you and pass along intel. Stay sharp, stay silent. No one can know you're on a mission.

Once you arrive at the library, you head straight for the Product Lifecycle & Waste display. Immediately the presenter seems off. He calls vapes **"clean tech"** with **"minimal waste and maximum vibes"** that **"can't be bad for the environment"**.

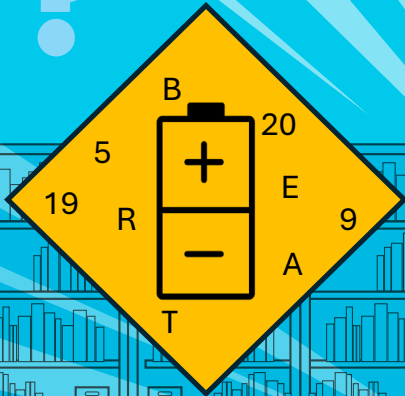

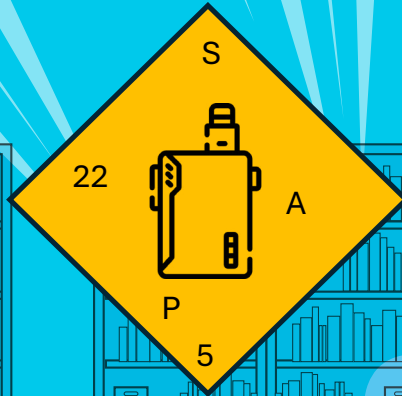

**"CLEAN TECH"**

Suddenly a voice behind you whispers gruffly, **"They hide the harm. They bury what they don't tell you. The toxic truth? Check your backpack agent."**
